LAWN GRASS SEED

BURNETT'S SPECIAL LAWN GRASS SEED

A perfect and enduring lawn, one of velvety appearance with closely interwoven, firm, deep and elastic turf, is only created by sowing a composition of the various kinds of grass seeds suited to the conditions and the climate. Several varieties are needed, that the lawn may be evergreen during all seasons and the seeds must be sown liberally (at the rate of from four to five bushels per acre), not only that a lawn may be produced quickly, but because the kinds of grasses suitable for perfect lawns are fine-leaved and should take entire possession of the ground promptly, thus checking the development of weeds, the seeds of which are in all soils. Good, rich, deeply worked soil, either of a friable texture or thoroughly drained, is as necessary for the production of a perfect lawn as for garden crops. Early and frequent mowing and rolling, as well as the liberal application of water, which should be applied in the early morning or late afternoon during dry seasons, is one of the secrets of maintaining beautiful green turf from early Spring to late Fall.

BURNETT'S SPECIAL
LAWN GRASS MIXTURE

The above mixture is made from our own formula, and composed of grasses specially adapted for the purpose of producing turf which retains its rich green color and velvety appearance throughout the entire Summer and Fall. In making up this high grade mixture we are careful to use only the very finest quality of all the most desirable dwarf evergreen, *recleaned* grasses, free from chaff and weeds, which thrive well on any soil, thus ensuring a beautiful and permanent lawn.

To obtain good results Lawn Grass Seed should be sown as soon as the ground can be prepared in early Spring. It may also be sown in the Fall with good results. One quart will sow 15 x 20 feet (300 square feet); 1 bushel, 100 x 108 feet (10,800 square feet); 4 to 5 bushels to the acre.

Price: Qt. 25c., pk. $1.75, bushel (20 lbs.) $6.00.

Burnett's "Killarney" Mixture

The above Lawn Grass Mixture "Killarney" is composed of a combination of the very finest European grasses and fescues, the highest grades possible to procure, and specially adapted for this climate. This mixture weighs 25 lbs. to the measured bushel, and is composed of all solid, recleaned seeds of the highest germination. Therefore, owners of large estates requiring a permanent sod and everlasting lawn should by all means use this high-grade mixture. We can recommend "Killarney Mixture," if the ground is properly prepared, to produce a turf of velvet, equal to the most famous Lawns in Europe. Give it a trial.

"Sow Killarney and walk on Velvet." Qt. 35c., pk. $2.50, bushel (25 lbs.) $8.50.

Burnett's "Bridle Path" Mixture

For Drives and Walks

The above mixture is adapted for a strong, hard-wearing turf of the finest texture, and is composed of some of the hardiest grasses, which will produce a close, thick sod and stand hard usage under all conditions. For drives and walks or any place where a strong turf is necessary, this mixture cannot be equaled. Qt. 25c., pk. $1.50, bu. (20 lbs.) $5.00.

Burnett's "Central Park" Lawn Grass

Burnett's "Central Park" Lawn Grass

This well-known mixture contains a large proportion of permanent grasses that grow quickly, producing a rich, green sward in about four weeks from time of sowing. Central Park is very hardy and has always given entire satisfaction in any location wherever sown. One quart will sow 15 x 20 feet; 1 bushel, 100 x 108 feet; 4 to 5 bushels to the acre. Qt. 20c., pk. $1.50, bush. (20 lbs.) $5.00.

Burnett's "Shady Place" Lawn Grass

BURNETT'S "SHADY PLACE" LAWN GRASS

When a lawn is much shaded, either in whole or in part, the shaded portions should be sown with Burnett's "Shady Place" Lawn Grass Mixture, which is a combination of fine, dwarf-growing evergreen varieties, which, in their wild or natural state, are to be found growing in the woods or other sheltered or shady places. Under or in the immediate neighborhood of large trees fertilizers should be applied liberally and frequently, for the trees absorb the fertilizer and impoverish the ground. Ground much shaded is very frequently sour, and if the drainage is defective it is apt to be covered with moss. In such cases an application of lime or wood ashes raked in will sweeten the soil, but the moss should be first removed with a sharp rake. Qt. 30c., pk. $2.00, bush. (20 lbs.) $7.00.

Burnett's "Bank and Terrace" Lawn Grass

BURNETT'S "BANK and TERRACE" LAWN GRASS

On sloping banks it is often necessary to use sod, as heavy rains wash the soil off before the grass seed has time to germinate. It is sometimes even necessary, in sodding very steep banks, to use pins eight or ten inches in length to pin the sods in place, to prevent them from being washed down by excessive rains before the grass roots have had time to fasten in the soil. The Terrace mixture which we offer is composed of deep-rooting grasses which, if once established, will hold the soil and prevent washing, and we advise liberal fertilizing and seeding so that the grasses may be quickly established. Qt. 30c., pk. $1.75, bush. (20 lbs.) $6.50.

We have made a specialty of Fine Grass Seed Mixtures for many years, suitable for Putting Greens and Fair Greens, and are direct importers of the various European grasses and handle largely the domestic varieties necessary for the formation of correct formulas to cope successfully with the many different conditions of soil, location and climate.

Many clubs have experimented with their greens until they have been successful in the combination of a mixture that gives perfect satisfaction in their particular location. In such instances we will be glad to offer the necessary grasses separate or make a mixture to the required formula.

FERTILIZING

The fertilization of golf courses is very important because proper fertilizing obviates the necessity of barn yard manure, which, although excellent, is frequently offensive. The use of manure also involves considerable labor, both in the application and the consequent removal of the coarse part in the Spring, besides resulting in the introduction of weeds.

Burnett's Golf Course Fertilizer

is unequaled when used either previous to or after seeding. The after-fertilization may consist of top-dressings, followed with a good sprinkling of water, at any time during the growing season, and without cultivation will be absorbed immediately by the soil and properly distributed by the capillary movements of soil water, hence it is invisible.

It removes acid from the soil, thus sweetens sour land and makes it productive. It permanently enriches the soil. Its effect upon yellow grass spots or land may be noticed within six days after its application by the grass turning to a deep green color. It is pulverized, clean and easy to apply. We advise for seeding down the use of from 800 to 1000 lbs. per acre and from 500 to 600 lbs. per acre when top-dressing. Price: 100 lbs. $3.50, 200 lbs. $5.50, ton $50.00.

BURNETT'S IMPORTED PEAS

We have selected from the numerous varieties offered the following, which have been tested and proved to be the most suitable for this climate. All these Peas are specially selected, great pains being taken to remove all " rogues " from the crop while growing, and when harvested all samples are hand picked, consequently the stocks are positively pure and true to name. They can be relied upon to give the best results and are becoming more popular every year.

Richard Seddon Peas

PEAS

One quart will plant about 100 feet of drill.

Peas do best in a light, rich soil; for private use sow in double rows 6 to 8 inches apart, the rows 2 to 4 feet apart, the tall ones requiring brush. Commence sowing the extra early varieties as soon as the ground can be worked in March; continue for a succession every two weeks until June. A good crop can be secured by sowing the extra early sorts in August for Fall use. The wrinkled varieties are not as hardy as the small round sorts, and if planted early should have a dry soil, or they are liable to rot in the ground; they are, however, the sweetest and best flavored.

BURNETT BROS.'

GRASS SEED MIXTURES

FOR HAY, MEADOWS AND PERMANENT PASTURES

Our Permanent Pasture, Hay and Meadow Mixtures are composed of varieties of grasses best adapted for producing an abundant and nutritious food supply for stock. Our formulas are arranged with great care and the mixtures are made to suit the exact location and condition of soil, etc., for which they are needed.

Nothing but the best recleaned seeds are used, consequently it does not take so large a quantity per acre as that generally used when poor quality mixtures are sown.

We recommend three bushels to one acre, which may be sown either in the Spring or Fall, with an additional ten pounds of Mixed Clovers sown early in the Spring. When ordering please state whether for high, dry, medium, wet or heavy soil.

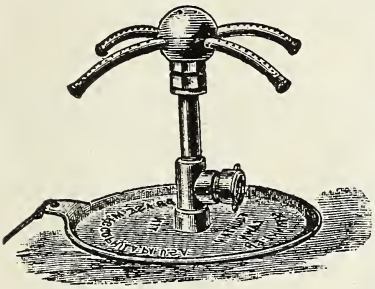
"Enterprise" Lawn Sprinklers



The advantages of these Sprinklers are as follows:

1st. Each machine is furnished with a cord or rope, so that the Sprinkler may be easily moved, when running, without going near it.

2d. The water passes through a strainer before it enters the small perforations, which are thereby prevented from filling up with dirt, etc.

3d. The weight of the revolving parts is supported by the water. This reduces wear to a minimum.

4th. All parts of the machine are made sufficiently strong for ordinary rough usage, and are interchangeable.

5th. The machine is tinned and nickel-plated and is of very handsome appearance.

Coldwell's "Demountable" Cutter Unit Horse Lawn Mower

Practically Two Lawn Mowers In One

The Demountable Cutter Unit Horse Mower is constructed upon an entirely new principle and is a wide departure from anything of the kind ever made. The cutter section, which is the vital part of a lawn mower, is made into a unit and is independent and removable from the main frame of the mower. This unit consists of a simple frame containing the revolving cutter, the bottom or stationary knife and parts necessary for adjusting the same to each other. It is attached to the main frame of the mower by four locking screws and can be attached or removed in less than a minute. It being separate and independent of the main or larger frame, it relieves the knives from the twisting and strain that usually occurs in the frame of the ordinary horse mower when in use on rough ground.

This unit, being the cutter section of the mower, is the only part necessary to send in to the factory for sharpening or adjusting. The great convenience in handling and the saving in freight and cartage charges between shipping an entire mower and the unit only, will be fully appreciated by all users of horse mowers.

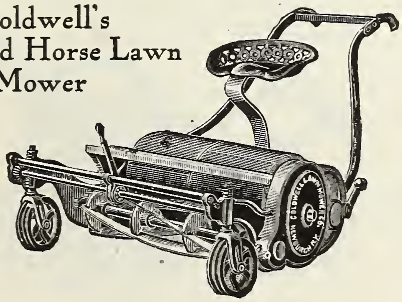
Coldwell's Improved Horse Lawn Mower



This well-known standard Mower has side-draft attachment, to enable the horse to walk on the cut grass only, and caster-rollers, which will not mark the lawn. Evenness of cut is assured by an adjustment which raises or lowers the two sides at the same time by means of a simple lever movement; the same lever serves the purpose of raising the knives from the ground when driving over gravel walks or roads.

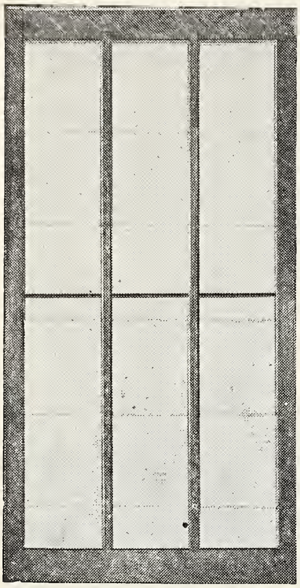
BURNETT'S REINFORCED HOT BED SASH AND SUNDRIES

Single Sash, Glazed–3x6x1½ in. Thick

Our sash are made from 1½″ gulf cypress, glazed with double thick "A" quality glass in lights 10″ wide, the top and bottom rails are 4″ wide, the side stiles 2½″ wide and the bars 1¼″. The bars are tenoned at both ends and mortised into the rails and the rails into the side stiles; the tenons are steeped in oxide of iron and oil before assembling. These sash are much stronger than the ordinary market sash and are tied across the center with a square iron bar, thus making the sash very rigid. They are painted two coats of white lead and oil and the glass is bedded in special greenhouse putty.



These sash weigh 40 lbs. each and are made perfect in every way.

Price, Glazed and Painted, complete. Each $4.25, doz. $48.00.

Price, Unglazed and Painted one coat. Each $2.00, doz. $22.00.

Price, Unglazed and Unpainted. Each $1.50, doz. $17.00.

Sash Double Glazed, Frost-Proof

The general opinion of gardeners who have given Double Glazed Sash a fair trial is that it has a considerable advantage over single glazed, as it will protect the plants in cold weather without the use of mats and shutters. In climates like New York and vicinity it is, however, necessary to use mats and shutters during the more severe weather. We believe that the bedding of the outer glass in putty is a decided advantage, as it makes the sash leak-tight. Aside from the double glazing these sash are made identically the same as our reinforced Single Glazed Sash.

Price, Glazed and Painted. Each $5.00, doz. $55.00.

Cypress Slats

Slats are for shading transplanted seedlings. The hot sun of August and September is too strong for the seedlings to stand. A week of the slats and they will have thoroughly strengthened up. They are also particularly useful for pansy growing. They are 3 feet wide and 6 long. The evenly spaced strips of cypress are let into the binding cleats and clinched into position by wire nails. They keep their shape, an important point with slats. Price, Painted. Each $1.50.

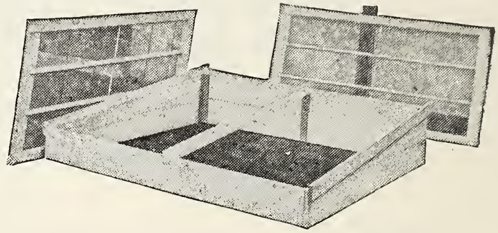
Hot Bed Mats

Frost-Proof, Burlap. 76x76 in. square; made of strong burlap cloth, filled with wool. Each $3.00, doz. $30.00.

Waterproof Duck. Filled same as above, with waterproof duck cotton cloth on one side. Size 76x76 in. Each $4.00, doz. $40.00.

Burnett's Garden Frames

All our frames are made of the finest air dried cypress. The sides and ends are held together by heavy wrought iron angle cleats. No nails are used in their construction. They are easy to put up or take down, and are made for regular standard 3x6 feet sash. They are 8″ deep at the front, 16″ at the back. The rafters are 3x3 inches and rabbeted for sash to slide on, and grooved to carry off the condensation. They are given two coats of best lead and oil before shipment. Shipped knock down. Two, three and four sash frames kept in stock—others made to order.



Price, without Sash for two Lights, $9.00.
Price, without Sash for three Lights, $10.50.
Price, without Sash for four Lights, $12.00.

Shutters

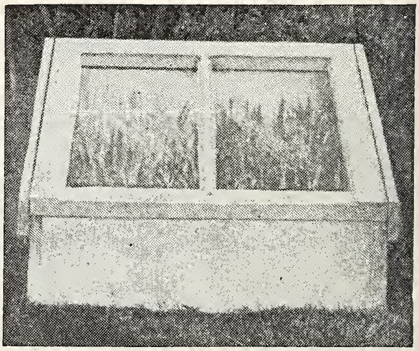
Shutters do three things: Keep the mats snug in place—protect them from the weather—and do their part towards keeping out the cold.

These shutters are "light to handle and stand the racket." They are 3 by 6 feet and made of ⅝-inch cypress, having tight tongued and grooved joints. The three cross binders on the under side hold the boards together and prevent them warping out of shape.

Price, Painted. Each $2.50, doz. $25.00.
Price, Unpainted. Each $2.00, doz. $20.00.

Melon Frames

Try a half dozen of these frames and not only have melons earlier, but melons with the true melon flavor. Starting early with frames gives them a chance to make good strong root growth to withstand the hot Summer's sun, so the best of the plant's strength can go into the fruit. Made in the same thorough way as our other frames.



Price, Standard Size 22½x25½, with two Lights of glass. Each $3.00.

Aphine is a liquid used at various strengths as directed on each can. It is a spray, wash or dipping solution, and is equally effective in the greenhouses or out of doors.

Aphine will destroy green, black, white fly, red spider, thrips, mealy bug, brown and white scale, currant and cabbage worms and all soft bodied insects.

Price: Pt. 65c., qt. $1.00, gal. $2.50.

FUNGINE

This well-known fungicide is proving an infallible remedy for mildew, rust, wilt and bench rot and other blights affecting flowers, fruits and vegetables. It is equally effective under glass and out of doors.

Fungine is a sulphur composition which dilutes with water. Containing no sediment it can be applied through the finest nozzle, but unlike lime and sulphur and Bordeaux mixture it does not stain the foliage but cleanses it. One gallon makes fifty gallons of spraying material.

For mildew on roses, chrysanthemum and carnation rust, it is a most efficient remedy.

Price: Pt. 75c., qt. $1.00, gal. $3.50, 10-gal. keg $30.00.

These products are the standard of the insecticide world and are giving perfect satisfaction wherever used.

Vermine

A vermicide and soil sterilizer for all soil vermin, such as eel, cut, wire and grub worms; slugs, root lice, maggots and ants. Can be used in the greenhouse, garden and field.

One part Vermine to four hundred parts water, thoroughly soaking the ground, does its work effectively without the slightest injury to vegetation and protects your crops and lawns against the ravages under the soil. Vermine will rid your benches of the worms and maggots and will not injure the plants.

A most effective remedy against the white red-headed grub which is doing so much damage to lawns and crops. An excellent material for ridding tennis courts and golf links of worms and other soil vermin. Price: Pt. 65c., qt. $1.00, gal. $3.00, 5-gal. keg $12.50.

Scaline

A scalecide, insecticide and fungicide combined—three in one—composed of a high grade petroleum combined with the properties of the fungicide Fungine. A most effective spraying material for San José, oyster shell and other scale, red spider, aphis larva and the grub of the locust borer which secrete themselves in the bark of the tree in the dormant season. Scaline will penetrate every crevice and destroy the insect pests which lodge in the bark.

It mixes readily—one part Scaline to twenty parts water—without agitation. It contains no sediment, and is applied with the finest nozzle in mist-like form. It is equally as economical as the lime and sulphur wash, less disagreeable to handle and more effective. Compare the two and you will be convinced.

Price: Gal. $1.50, 10-gal. keg $10.00, bbl. (50 gals.) $37.50.

Nikotiana

Twelve percent Nicotine

SPRAY AND FUMIGANT

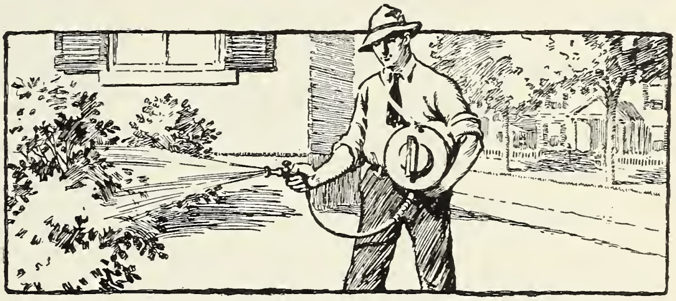
For fumigating, Nikotiana can be applied by painting or pouring it on the steam pipes, or by vaporizing in small pans over lamps. Fumigating with liquid prevents filling the house with smoke as do tobacco dust, stems or paper, which is injurious to foliage and blooms. Fumigating with Nikotiana simply emits fumes which destroy the insects.

Compare the relative efficiency and cost of Nikotiana with the higher priced nicotines and you will find Nikotiana the most economical.

Price: Qt. $1.50, gal. $4.50.

THREE STERLING PREPARATIONS FOR THE GARDENER

"READEANA" THE ROSE BUG EXTERMINATOR



READEANA

A most effective insect killer that is absolutely harmless to even the most delicate flowers or foliage.

As a killer of insects of every kind from the hardy Rose Bug to the destructive Caterpillar, there is nothing on the market to equal it.

It is very economical to use as it is sent out highly concentrated, and may be diluted with from twenty to sixty parts of water.

It is not a chemical but is made up of vegetable matter, thus making it harmless to flowers or foliage. It will put new life into flowers and plants, as it has a brightening effect on the same.

Put up in the following size packages.

4 ounces	$0.25	½ gallon	$2.25
8 ounces	.50	1 gallon	4.00
1 quart	1.35	5 gallons	17.50
10 gallons	$34.00		

Full directions accompany each package.

"ELECTRIC" WORM ERADICATOR

Clears roots of trees, plants, flowers, vegetables, etc., of worms, grubs and insects of every kind.

This preparation is designed for use on the roots of plants only, not the foliage. Used as directed by us, it is perfectly harmless to the most delicate roots.

From one to two ounces to each gallon of water brings worms, grubs, etc., to the surface of the ground within a few seconds, where they die immediately.

Much damage is often done to plants and the true reason never known, for the destructive work is being done at the roots where it is not perceptible. An application of "Electric" Worm Eradicator will greatly improve such plants, it being a fertilizer as well as a worm killer.

4 ounces	$0.25	1 gallon	$4.00
8 ounces	.50	5 gallons	17.50
24 ounces	1.00	10 gallons	34.00

Full directions accompany each package.

"HERBICIDE" THE WEED EXTERMINATOR

Kills grass and weeds of every kind on roadways, gutters, tennis courts, etc., by one application.

Keeping roads and gutters free from weeds is an endless task when ordinary means are employed, for it is practically impossible to get the roots out, so it is only a matter of a few weeks before new tops are flourishing and it is necessary to go over the ground again.

One application of "Herbicide" when diluted with forty times its bulk of water kills both tops and roots of grass and weeds of every kind, and also prevents the growth of further crops by its sterile effects on the ground.

Its use will save much labor and expense in the long run.

1-quart cans	$0.50

POULTRY REMEDIES

CONKEY'S LAYING TONIC. Lots of people don't believe in forcing feeds. But everybody wants eggs in Winter when eggs mean money. Conkey's Laying Tonic fills the egg basket in spite of the weather. It is not a food, but all tonic medicine to be mixed with the regular feed during seasons when fowls get sluggish and want to loaf instead of lay. It invigorates and tones the whole system, gives an appetite, insures digestion of the food taken, and then the egg organs do their work naturally. It's a fine thing to have eggs in Winter. We highly recommend this laying tonic because it does not injure the fowls. It is very economical as you mix it in small quantities with the regular feed, the packages containing all pure medicine, no filler or food stuff whatever. Prices, 25c. and 50c.

CONKEY'S NOX-I-CIDE. It is always easier and cheaper to prevent than to cure. Conkey's Nox-i-cide is an all-around preventive as it keeps the quarters sanitary and kills the germs. Use it as a dip, disinfectant, spray or as a lice liquid. Mixes with water, so it's cheap enough, every gallon making from 50 to 100 gallons ready to use disinfectant. You should spray it in runs, yards, etc., and use it in the cleaning water when you wash up the feeding utensils, drinking founts, etc. Remember, most diseases are preventable, and especially those hardest to cure. Prices, pt. 35c., qt. 60c., gal. $1.50.

CONKEY'S ROUP REMEDY. Here is one remedy that should be on every poultryman's medicine shelf for use at the very first symptom of sneezing, coughing or moping. Use it as a preventive as well as a remedy and put it in the drinking water when the weather is unsettled, thus avoiding all danger of cold and roup. A little of it occasionally is a good tonic. Remember that roup is highly contagious. Neglect to treat promptly endangers your whole flock. But even in neglected stages don't despair but use Conkey's Roup Remedy according to the special directions for worst cases. We guarantee this treatment—your money back if it ever fails you. Prices, 25c., 50c. and $1.00.

CONKEY'S LICE POWDER. When the fowls don't do well always look for lice. If you don't find them, look again. Lice and poultry go together. But lice and profits never go together and you must rid your fowls of lice if you want poultry satisfaction. Conkey's Lice Powder is excellent for ridding fowls of body lice as it quickly kills these pests when sifted into the feathers of the bird, and it does not injure the fowls or even taint eggs in the nest. Just the thing for setting hens and for dusting in nests. A great big package will be sent you free for stamps, 4 cents, so you can test it. Prices, 25c. and 50c.

POULTRY REMEDIES—Continued

CONKEY'S WHITE DIARRHŒA REMEDY is a special preventive and remedy for this dread scourge of incubator chicks. Conkey's White Diarrhœa remedy is successful even in bad cases, if the hardened accumulation around the vent is removed as directed in Conkey's Poultry Book. The best way is to use it as a preventive. If given to breeding stock it will prevent infection at its source. Given in drinking water. Prices, 25c. and 50c.

CONKEY'S GAPE REMEDY. Here is another chick saver. Gapes is a troublesome disease, tedious to cure, but this remedy is highly successful. Easily given right along with the water and feed, so there is no troublesome individual treatment. Money back guarantee. Price, 50c.

CONKEY'S HEAD LICE OINTMENT is another life saver for little chicks. If a chick droops always look for lice, for two or three of these big fellows on head, neck or under wing can actually murder a little chick. It's easy to kill the head lice without hurting the chick if you use Conkey's Head Lice Ointment. Just a touch of it will be enough. Prices, 10c. and 25c.

CONKEY'S SCALY LEG REMEDY. There is nothing deadly about scaly legs, but it ruins the appearance and value of your birds. With Conkey's Scaly Leg Remedy you can keep the feet in nice shape, and it is just the thing for getting show birds ready. Price, 25c.

CONKEY'S POULTRY TONIC. Sometimes fowls get in a general run down condition and it is hard to tell just what ails them. A bird in such condition should be treated for lice and then given Conkey's Poultry Tonic. Or you can use it for little chicks that are not making good growth. Then watch them thrive. This is a fine general tonic during moulting season or after recovery from any disease. It is much used for conditioning show birds. Price, 25c.

CONKEY'S LIMBERNECK REMEDY. Here is another disease well known to poultrymen. in hot weather never be without this remedy. You will not lose a bird from limberneck if you give this medicine promptly. Usually one day's treatment is enough. But don't let the disease be too quick for you. Have the remedy on hand. It is true you may never have occasion to use it—but then again it may save you your whole flock. Price, 50c.

CONKEY'S CHICKEN POX OR SORE-HEAD REMEDY. Sore-head is getting to be one of the most serious troubles. Don't take chances this Fall and Winter but have this remedy on hand for use at the first signs of scabby warts on comb and face. The disease is contagious and spreads rapidly. Treat it promptly and save your flock. Price, 50c.

CONKEY'S BRONCHITIS REMEDY. Bronchitis is different from roup, and needs a special treatment. Price of this special remedy, 50c.

CONKEY'S POULTRY LAXATIVE. Price 25c.

BURNETT'S RELIABLE POULTRY FOODS

Our foods are selected with the greatest care; nothing but the very best grain, etc., is used in their composition; a trial will convince you of their superiority.

SCRATCH FOOD (without grit). This is a splendid food for growing birds and laying fowls. It is mixed to keep a healthy, hardy flock of birds at all times. For laying hens we recommend feeding our scratch food, both at the morning and evening meals. 5 lbs. 20c., 10 lbs. 30c., 100 lbs. $3.00.

SCRATCH FOOD (with grit). Similar to above but with an addition of grit. Some fanciers prefer to have their scratch food mixed in this way. 5 lbs. 20c., 10 lbs. 30c., 100 lbs. $3.00.

MASH FOOD. Should always be fed dry. In the dry state you can keep it before the fowls all the time with the assurance that they will not over eat, as they would do if it were wet. Wet mash always sours and upsets the digestive organs. 5 lbs. 20c., 10 lbs. 30c., 100 lbs. $3.00.

PIGEON FOOD. This mixture is the best in existence and includes all grains that pigeons like and thrive on. This combination makes the largest squabs in the shortest time, with the whitest and juciest flesh. 5 lbs. 20c., 10 lbs. 35c., 100 lbs. $3.50.

CHICK FOOD. This is the correct food for young chicks and can be depended upon to bring them along in good shape, from their first meal until they are six weeks old. It should be fed dry with plenty of fresh water always on hand. We can thoroughly recommend this food to all poultrymen who really desire the best. 5 lbs. 25c., 10 lbs. 45c., 100 lbs. $4.00.

BEEF SCRAP. When feeding beef scrap to your fowls always be sure to get the best. If you give poor scrap you will be sure to have serious trouble with your flock. The beef scrap we offer is the very best that can possibly be produced; the analysis of which is protein 55 per cent. and up. 5 lbs. 25c., 10 lbs. 45c., 100 lbs. $4.00.

"Blue Gem"

For many years the aim of the Sweet Pea lover has been to get a variety of a true, clear blue color, free from the reddish and mauve tint so common in the standards of other existing blue varieties. This new variety we claim to be almost, if not quite, free from this—a beautiful clear mid-blue. The flowers are of good size, true Spencer form, throwing fours freely. The plant is of strong constitution and free flowering. Per pkt., **25c.**

"The Lady Eveline"

A grand new rosy mauve, for all purposes ideal. It is bound to be the mauve of the show bench. Its great size and lovely color are enhanced by the perfect placing of the flowers, which are duplex in character. No variety equals it for a massive vase. It resists bad weather, and four-bloomed sprays are common. For garden decoration the rows or clumps are covered with huge blooms, and growers are recommended not to plant out too thickly. Per pkt., **25c.**

"Constance Acomb"

Creamy white, suffused delicate mauve, with buds opening deep cream and wire-edged mauve. A strong grower with long stems, carrying four well placed flowers, waved and very effective in the bunch. Per pkt., **25c.**

"Fiery Cross"

"Fiery Cross" has all the appearance of live fire, the color being a scorching fire red, or scarlet without any shading and which scintillates and glitters in bright sunlight, thus adding a glowing fire-like sheen. Per pkt., **25c.**

"Hilary Christie"

Beautiful and distinct novelty. Color, standard salmon orange, edged with fiery orange scarlet, wings rosy salmon. Most decorative, strong grower, good size and form. Per pkt. of 20 seeds, **25c.**

"The President"

The name given this magnificent novelty is most appropriate, as among orange-scarlet Sweet Peas it undoubtedly takes top place. The intensely rich and dazzling orange scarlet color of the flower equals in brilliance the Oriental Poppy. The plant is very robust, producing freely flower stems 16 to 18 inches long, carrying four perfectly placed flowers of largest size and true Spencer form.

Both for exhibition and garden decoration, "The President" is the most striking and valuable addition to Sweet Peas that has been offered in recent years. Per pkt., **50c.**

"Jean Ireland"

A large flower of great refinement. The color is creamy buff, the fine broad standard and wings being beautifully edged and shaded with carmine rose. This variety will certainly take first place in the picotee-edged (cream ground) section. It is a fine free grower, and gives abundance of four-bloom sprays fitted for the keenest competition or the most artistic table decoration. Per pkt. **25c.**

"Mrs. E. A. Tanqueray"

Beautiful salmon cerise, very brilliant color, sunproof and quite distinct. The flowers are large, and produce many with four blooms to a stem. Per pkt. **25c.**

"White Perfection"

An extra large white of good substance, strong grower, flowers exceptionally waved. Throws fours freely, and in some cases five and six flowers to a stem. A really great white variety. Per pkt., **25c.**

EREMURUS—GOLD MEDAL HYBRIDS

The Eremurus, or "Hardy Foxtail Lilies," are rapidly becoming known as amongst the most desirable of Hardy Plants for the border and massing. The intercrossing of the species, selection of and recrossing the hybrids over a period of 20 years, has resulted in producing many delightful new colour forms, white, cream, primrose, pink, yellow, bronze, old gold, copper, amber buff, etc. These are all July flowering forms, perfectly hardy, like full sunshine and a soil that, though good, is not too heavy. They vary in height from 6 to 10 feet, and, once established, will go on for years improving and increasing. They are raised easily from seed, and are of easy cultivation. Per pkt., **50c.**

careful selection and re-selection, eliminating all the inferior forms, and intercrossing the best of the selected varieties. The seed can be relied upon to produce every shade from white to deep glowing crimson, many of the bright clear pinks being of exceptional beauty. Invaluable for the Herbaceous border. Per pkt., **30c.**
